State Leadership Team – At a Glance

West Virginia has a long history of collaboration across early childhood programs. This collaboration has assisted in the development of a very dedicated and committed state leadership team. To date the ECPBS initiative in West Virginia has focused on supporting personnel who work with children in collaborative Pre-K classrooms. Through the work of the WV State Leadership team, the state is poised and ready to expand the current initiative to be inclusive of professionals who support children ages birth to five in all early childhood settings including those professionals who support infants and toddlers and their families.
